

Integrating visual communication and storytelling in Software Engineering without being a pixel-pusher

Vaishnavi V

Penguin Dataset

Goal

Determine the species of a penguin based on the following:

- Culmen length
- Culmen depth
- Flipper length
- Body mass

Disclaimer

Dunning-Kruger effect

Definition

Visual communication is the practice of using visual elements to get a message across, inspire change, or evoke an emotion.

Perfect MVP

- Communication design refers to crafting a message that educates, motivates, and engages the viewer.
- Graphic design uses design principles to communicate that message in a way that is clear and eye-catching to the intended audience.

Visual thinking externalizes thinking so you and others can "see what you mean." This allows you to:

Working Memory – Information Processing

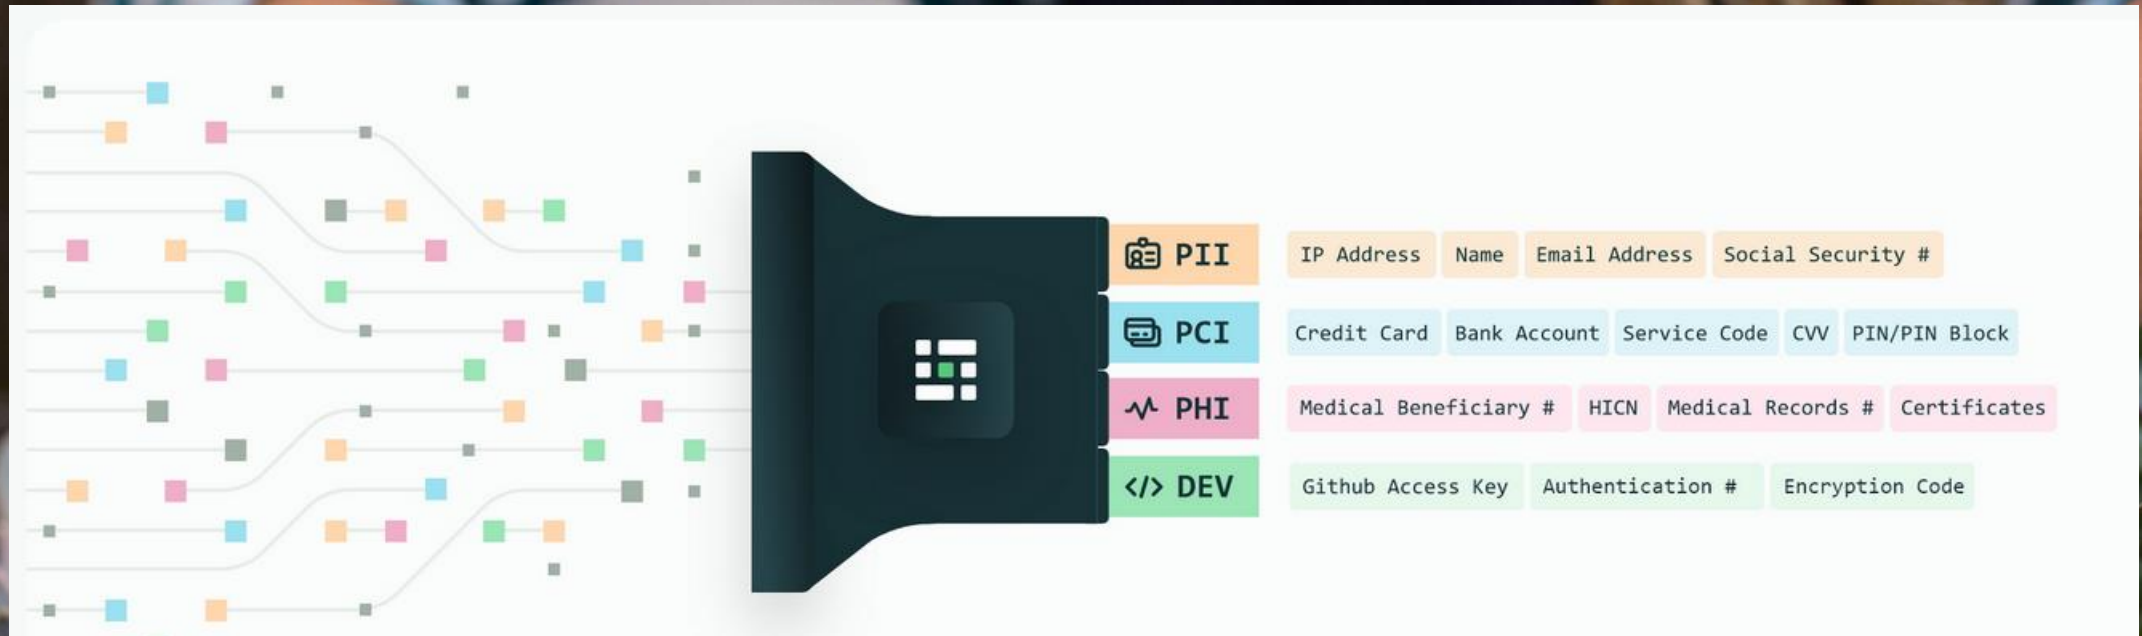

George Miller's Magical Number of Immediate Memory

A close-up photograph of a person's hands holding a succulent plant. The person is wearing a blue and white checkered shirt. The succulent has thick, fleshy, light blue-green leaves. The background is blurred, showing more of the same plant and the person's torso. A semi-transparent orange rectangular box is overlaid on the right side of the image, containing the word "Examples" in a dark serif font.

API

What is an API?

@Rapid_API 

An application programming interface allows two programs to communicate. On the web, APIs sit between an application and a web server, and facilitate the transfer of data.

How it Works:

1 Request
API call is initiated by the Client application via a HTTP request

2 Receive
Our Worker bee acts as an API, going to a Flower (server) to collect nectar (data)

3 Response
The API transfers the requested data back to the requesting application, usually in JSON format

A close-up photograph of a person's hands holding a succulent plant. The person is wearing a blue and white plaid shirt. The succulent has thick, fleshy, light blue-green leaves. The background is blurred, showing more of the person and other plants.

Not this!

- White, 76.1%
- Hispanic or Latino, 7.8%
- Asian, 7.7%
- Unknown, 3.9%
- Black or African American, 3.8%
- American Indian and Alaska Native, 0.7%

Colors?

Women Earn 92¢ For Every \$1
Earned By Men

Male Income

The most common ethnicity among chief diversity officers is White, which makes up 76.1% of all chief diversity officers. Comparatively, there are 7.8% of the Hispanic or Latino ethnicity and 7.7% of the Asian

WHAT PEOPLE THINK EMPATHY IS

earthbound madness

Feeling sorry for someone

WHAT EMPATHY ACTUALLY IS

- Sensing other peoples emotions
- Imagining how someone feels
- Imagine what someone is thinking
- Mirroring someone's feelings
- Identify how a person is feeling
- Understanding another person's feelings
- Seeing things from another point of view
- Really listening to what others have to say
- Feeling overwhelmed by others tragedy

Manual Of Me

Team manual

This is me
(drawn by me)

The conditions
I like to work in

The times/hours
I like to work

The best ways
to communicate
with me

The ways I like to
receive feedback

Things I need to
work well

Things I can
struggle with

Things I love at
work

Other things to
know about me

A user manual for me: Cassie Robinson

Hello,
I'm Vaishnavi

Vancouver

Things I ❤️

Teaching

Public Speaking

Visual Communication

Things I do 🧠

Software Engineering

Ideation

Team collaboration

How to Give Me Feedback 📖

Direct constructive feedback provided with utmost honesty to help me grow. Data driven and candid conversations with potential solutions for me to thrive and succeed.

Comms Preferences 🌐

Working Patterns 🌞

- Morning Person
- Enjoy a quiet and vibrant environment
- Follow Pomodoro Technique 🍅

Things I struggle with 🧑‍🦹

Mickey Mouse Job
#halfbaked

Yak Shaving

Interruptions

“Simple things should be simple,
complex things should be possible.” - Alan Kay

101  Switching Protocol
426  Upgrade Required

MISSION

302  Mission Found

Empower marginalized community through the power of technology, story telling and visual communication one person, one story, one visual at a time.

VISION

100  Continue
103  Early Hints

To serve as an empathetic and honest leader and use my voice as a speaker and advocating for representation in tech to improve the lives of underrepresented people..

WARNING

406  Not Acceptable
504  Gateway Timeout

-  All my scheduled meetings need an agenda.
-  Known to burn myself out.
-  Tackle the Talkers and Enable the Doers
-  Swiss Army Knife
-  Struggle to take compliments
-  Trying to channelise my Internal Saboteurs

MANAGEMENT style Enhance Your Calm

Combination of Quiet, Servant and Visionary Leadership

```
JS HelloWorld.js  
  
document.write('Hello World');  
console.log('Hello World');  
alert('Hello World');
```

INTERESTING FACTS

200  OK
418  I'm a teapot

-  I believe in the power of documentation.
#DocsOrItDidntHappen
-  I thrive on honest and candid feedback.
Afterall feedback is the breakfast of the champions
-  Passionate about accessibility, diversity, usability and neurodiversity.
-  Love to solve 1000 piece jigsaw puzzles
-  Love people watching and a selenophile

KNOWN DEFECTS

500  Internal Server Error
506  Variant Also Negotiates

-  People pleaser, leading to overcommitment
-  Struggle to say no
-  Self-critic
-  Don't always take my own advice
-  Falling victim to comparison trap
-  Can get in my own way
-  Sensory overload

Ideas

Containerization (Optional)

Think of shipping containers on a boat.

A shipping container is like a Docker container.

A port is a facility that will load/unload, manage, move, inventory, and handle shipping and movement logistics. This is Kubernetes.

Containers are horses and Kubernetes is the Ranch managing those horses.

You decide how many horses in the ranch and the Ranch Manager will make sure to keep that many horses there at all times. They can also bring other horses from other ranches if one dies to make sure they always have exact amount of horses you specified

Kubernetes automates a lot of the cloud set and forget stuff. How do you have redundancy's. Tell kubernetes I want 3 of these boom you have three. What's underneath? Maybe docker. Instead of you doing the scripting docker does it.

What next?

Convergence

In today's digital world, AI, cloud computing, the internet of things (IoT), and superfast networks such as 5G are the cornerstones, and data is the fuel that drives them all. These technologies are some of the data science latest trends. Together, these technologies enable much more than they can do separately.

DEEPPFAKE TECHNOLOGY: SEEING IS BELIEVING, OR IS IT?

Deepfakes, Generative AI, and Synthetic data

- Synthetic faces of people who have never existed can be created to train facial recognition algorithms while avoiding the privacy concerns involved with using real people's faces.
- It can be created to train image recognition systems to spot signs of very rare and infrequently photographed cancers in medical images because of lack of data due to privacy reasons, financial constraints, and rare diseases with few examples and little data to pull from.
- To create language-to-image capabilities, allowing, for example, an architect to produce concept images of a building simply by describing how it will look in words.

Deepfakes, generative AI, and synthetic data

- Synthetic voices have been used to help patients with ALS (Amyotrophic Lateral Sclerosis) who, due to the disease, often lose some or all of their ability to speak. With the use of this technology, they can speak with their loved ones with a voice that sounds just like theirs.
- For educational purposes, deepfakes can be used to imitate teachers or bring back historical figures.
- In film, the accessible nature of deepfakes means that independent creators without huge budgets can create their art.
- online shoppers trying on clothes in virtual fitting rooms, for dynamic museum dioramas and for actors hoping to speak multiple languages in international movie releases.

Deepfakes, Generative AI, and synthetic data – Word of Caution

- Double Edged sword
- Deepfakes are often weaponized against women. The majority of deepfakes on the internet are pornographic, in which female celebrities' faces are infused into these videos.

Brave Conversations

Public event that brings together people from different walks of life, to debate and understand our fast changing reality, catalyzed by the Web and AI.

Our 21st Brave Conversations in the heart of the European Union as the world struggles to come to terms with the Age of AI for Humans

Thank you
