

What type of session is/are the speaker(s) submitting for?

Featured Speaker: Groundbreaking thought leaders and change makers shaping the tech industry, introducing the main topic of the conference and setting the tone for the conference of the Grace Hopper Celebration.

Panel: An engaging exchange of opinions with counterpoints among peers on a specific topic. Workshop: Immersive sessions offering hands-on activities for practical learning and tangible takeaways in skills development, personal growth, or technology demonstrations.

Presentation: A talk about technology, research, and/or career tips to boost women and nonbinary technologist's growth and inclusion in STEM.

Lightning Talk: Informal AMA style discussion with experts in tech.

Open Source Day Project: An all day event dedicated to community-driven exploration and learning with open source technology.

Braindate: Casual, topical networking and knowledge sharing on demand.

General Session: Select this option if you wish to facilitate or lead a session for any AnitaB.org event. This is ideal for speakers who have valuable perspectives and expertise on topics related to career growth, technical upskilling, leadership, and diversity, equity, inclusion, and belonging but do not have a proposed session to offer.
