Thanks a lot to [Vaishnavi Venkata Subramanian](#) for the Amazing "Talk Driven Development (TDD)" talk today. It is Not the usual TDD we know. I resonated many slides in this talk. My first public speaking was 2018. It was a scared to death experience in SF Python meetup. Then after ~40+ public speaking's, it is very comfortable standing on stage and talk. It later helps me become GDExpert and achieve many accomplishments ! I voted this the BEST #1 talk today !
