Call for Papers Close (round 2): August 31, 2023

We love to see brand new speakers, seasoned speakers, and everyone in between! Topics of interest include (but are in no way limited to) the following, preference given to talks that actually provide solutions as well as insight to problems in:

Information technology
Network security
Web Application security
Industrial Control Systems / SCADA Security
Cyber-kinetic systems
Mobile security
Virtualization and cloud computing
Innovative attack / defense strategies
Forensics / Malware
Embedded device security / Internet of things
Biometrics
Hardware hacking
Phone phreaking
Biohacking
Open source software
Evolutionary computing
Robotics (bonus points for bringing an actual robot)
Massive abuse of technology
Social Engineering
Quantum Computing

limited to):
Energy and Utilities
Finance
Food
